# Preface

The pharmaceutical industry is a capital and knowledge intensive industry that moves fast relies on innovation capability. As the one of the fastest developing business, pharmaceutical industries in the world are growing rapidly, especially in Indonesia. The growth of the pharmaceutical market in Indonesia is increasing every year and this condition makes Indonesia transforming as a new growing market in Asia.

Rapid changes in the economic and trade poses many challenges to the Indonesian pharmaceutical industries, including win the competition and become the market leader. Nowadays, there's a lot of Indonesian pharmaceutical industries seek to accelerate the advancement of industries to overseas market. One of which is with performances and exhibitions held in many countries around the world. In line with that, Indonesian government has declared its intention to promote the Indonesian pharmaceutical industries.

In an effort to promote its pharmaceutical industries, Indonesia needs to compiled an English Guide Book of Pharmaceutical Industry as known as Indonesian Pharmaceutical Industry Directory. This book has a role to introduce Indonesian industries in the eye of the world. Indonesian Pharmaceutical Industry Directory is a book intended for investors, governments and other pharmaceutical industries related. The first edition of this book consists of 113 out of 206 pharmaceutical industries available in Indonesia.

Indonesian Pharmaceutical Industry Directory would be the base for presenting independent information about the Indonesian pharmaceutical industries and support the Indonesian pharmaceutical industries in publicizing themselves globally.

Director General,

ttd

Dra. Maura Linda Sitanggang, PH.D

On October 1, 2013, Actavis announced that it has completed its acquisition of Warner Chilcott plc, creating an \$11 billion leading specialty pharmaceutical company, offering generics, branded generics, brand and Over-the-Counter products in more than 60 countries. Actavis also becomes the third-largest U.S. specialty pharmaceutical company with over \$3 billion in pro forma sales.

The combination of Actavis and Warner Chilcott reshapes the specialty pharmaceutical universe by creating a powerful global competitor, with our brand pharmaceutical business focused on developing and delivering innovative products in the important therapeutic categories of Women's Health, Urology, Gastroenterology and Dermatology.

Combined, the two companies have approximately 19,000 highly-skilled employees in more than 60 countries across five continents, serving more than 5 billion of the world's consumers.

We are an innovation driven, global, biopharmaceutical company. Our mission is to make a meaningful difference to healthcare through great medicines. Globally, we have 50,000 employees, research across 3 continents, manufacturing in 16 countries, sales in 100 countries. We are focusing on long-term innovation and distinctive science in three core therapy areas: Cardiovascular and Metabolic disease, Oncology, and Respiratory, Inflammatory & Autoimmune disease. Alongside this, we remain active in Infection and Neuroscience with targeted investments in the best opportunities and collaborations. We have a unique combination of strengths in biologics and small molecules, immunotherapies and protein engineering technologies. We continue to leverage our strengths and build those we need in new sciences and technologies, such as personalised healthcare and predictive science. The pursuit of scientific excellence that addresses unmet needs guides everything we do.

Bio Farma is a state owned enterprise established in August 6, 1890 in Jakarta under the name of Parc Vaccinogene. In 1923, it moved to the present site in Bandung, capital city of West Java province in the Republic of Indonesia. Bio Farma since its early establishment has played an important role as the only institute in Indonesia producing vaccines and antisera. One of the specific tasks of Bio Farma is the production of vaccines for the national immunization program particularly against diphtheria, pertussis/whooping cough, tetanus, BCG, polio, measles, Hib and hepatitis B. The availability of assured quality vaccines contributes to the success of Indonesia in eradicating smallpox and reaching Universal Child Immunization (UCI). Bio Farma is the only vaccine producer of Indonesia, dedicating all its resources in producing international-standard vaccines and antisera in support of the national immunization program towards realizing better health for the people of Indonesia. Bio Farma is one of some 23 vaccine manufacturers in the world that have obtained the WHO (World Health Organization) Prequalification Certification. Following WHO Prequalification status, Bio Farma has been expanding since 1997 to market its products to overseas markets and currently exports to more than 126 countries. Entering its 123rd year, Bio Farma is highly optimistic about its prospects of sustained growth to become a globally-competitive vaccine and antisera producer.

Bio Farma is licensed to manufacture vaccines and antisera using biotechnological processes. Vaccines and antisera manufactured by Bio Farma are as follow :

- Vaccines: DTP-HB vaccine, DTP vaccine, DT vaccine, Tetanus vaccine, Td vaccine, Oral Poliomyelitis vaccine, Measles vaccine, BCG vaccine, Hepatitis B vaccine, mOPV1, Seasonal Flu vaccine, bOPV types 1 and 3, Pentabio (DTP-HB-Hib vaccine).
- Antisera: Tetanus antisera, Diphtheria antisera, Polyvalent snake venom antisera.
- Diluents for freeze-dried vaccines: Measles diluents and BCG Diluents.

**Products Owned by Pharmacotherapy Classes**

- Immunologicals (Sera and immunoglobulins)

PT Darya-Varia Laboratoria Tbk (Darya-Varia) was established in 1976, and is now one of the foremost producers of soft gelatin capsules in Southeast Asia. Darya-Varia operates production facilities in Darya-Varia plant in Gunung Putri-Bogor, which specializes in the production of soft gelatin capsules and liquid products.

In 1995 & 1996 Darya-Varia acquired PT Pradja Pharin (Prafa), and in 2003 forged synergies with Unilab Group affiliates (including PT Medifarma Laboratories) for the marketing of prescription and OTC products, business development and optimization of services and facilities.

Darya-Varia has three main business focuses, namely:

- a) The Prescription business
- b) The Consumer Health business (combination of Over-the-Counter (OTC) and Naturals)
- c) The Export and Toll Manufacturing business

**Vision:** To be a Top Five Pharmaceutical Company in Indonesia

**Mission:** We are building a healthy Indonesia one person at a time, by providing affordable, quality healthcare products and services, and advocating for health promotion, working together as one "BERSATU" family.

In line with the Company's mission of promoting a healthy Indonesia, Darya-Varia operates a variety of CSR programs under the banner "Sehat Indonesiaku" (My Healthy Indonesia).

Darya-Varia exports its products to the countries of Cambodia, Hong Kong, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Vietnam and Yemen.

Dexa Medica has evolved from a small company established in 1969 to one of Indonesia's largest ethical pharmaceutical companies at the beginning of the 21st century and has become a prominent, well-respected player in the domestic pharmaceutical market.

Providing better health care by applying expertise was the foundation on which its founders built this Company. Honesty, trust, dedication and commitment to providing patients with the highest quality of ethical pharmaceutical products are preserved as the guiding principles, based upon which the highly professional management team and the motivated, competent staff of Dexa have developed the Company in the spirit of mutual respect, teamwork and innovation over more than three decades.

Serving as a good corporate citizen is one of our responsibilities and being a strategic asset of Indonesia is one of our foremost desires. For along time Dexa has worked together with governing institutions and the Indonesian Pharmaceutical Association – championing compliance and improving the industry standards.

PT Eisai Indonesia is an Indonesian pharmaceutical subsidiary of Tokyo-based Eisai Co., Ltd. <http://www.eisai.com/>, a research-based human health care (hhc) company that discovers, develops and markets products throughout the world. We place primary emphasis on patients and their families, we strive to increase the benefits that health care provides them and we conduct our business to meet their diversified health care needs worldwide. We aim to be a human health care (hhc) company (<http://www.eisai.com/corporatemission/mission.html>) that makes a meaningful contribution under any health care system through our business activities around the world.

PT Eisai Indonesia was established on March 23, 1970. Our main businesses are manufacturing and marketing of pharmaceutical drugs and over-the-counter drugs.

Our strategy in achieving business goals are formulated in a sentence: "brand demand-creation, knowledge driven organization", through the following four major initiatives:

- Clean-up the trade channels.
- Set up Sales Force Effectiveness (SFE) with focus on Doctors Call System, Management Information System, and Targeting and Segmentation.
- Cross functional training teams.
- Performance management systems and reward systems anchored on hhc to make "Eisai Product Knowledge and Disease Knowledge" as the core differentiation.

PTEI got A grade of GMP evaluation by BPOM (Indonesian FDA) in the first evaluation in 2005 and Got New GMP Certificate in FY2010 in the first priority (30 out of about 205).

With the philosophy "Stay Healthy With Us", PT Erela has an important role in improving people's health in Indonesia and become one of the world's leading pharmaceutical companies fulfilling people's needs in maintaining a healthier existence. The modern building and production facilities were acknowledged as having met the quality standards in accordance with the GMP (Good Manufacturing Practise). Based on the Quality Management System (QMS) which is integrated with GMP and ISO 9001, quality is assured and maintained throughout all departements beginning with the screening production process, to the final shipping and delivery process, including the handling of customer complaints in order to achieve total customer satisfaction in the end. To achieve the mission in producing with the high quality products, a good team work within the entire management process is needed. Research and Development is responsible for the development of new product because the latest developments and innovations in the field of health is one of our primary concern. Quality control is the most important departement to guarantee the consistency of the products quality starting from the process of selecting and receiving raw materials up to the packaging and shipment of finished goods. The company realizes that one of the key success factors in the dedication and commitment of its human resource to work hard, to remain highly motivated and to always find new ways to accomplish customer satisfaction. So, the company provides a safe and healthy work environment and comfortable working atmosphere to assure employee's satisfaction. The company has established a marketing team which has grown significantly, promoting our products directly to pharmacies, doctors, hospitals and government institutions especially a wide range of generic products.

As times change, PT. ERRITA PHARMA grow and thrive. Some of our progress include in obtaining Good Manufacturing Practice (GMP) certificate in 2012 and 2013 for our Non Betalaktam products. Moreover, we also have ISO 9001:2008 certificate for quality management system and ISO 14001:2004 certificate for environmental management system. All this we do to constantly providing high quality products specially to the local people and generally for global public, that motto PT. ERRITA PHARMA "Care Public Health" can always realized.

Our Vision is to become a pharmaceutical manufacturer who cares about international welfare of the world community and our Mission is to always provide high-quality products, easily accessible by the public, and perform research and development so that we can continue to innovate for participate in the global market.

Human resources is a valuable asset for our company. Through a rigorous selection process and ongoing training program, making employees of PT. Errita Pharma as human resources competent and reliable. Answering the challenge of world health, PT. Errita Pharma strive to create high quality products.

Procurement of new machines and high-tech facilities and improvements infrastructure is a manifestation of our commitment to produce products that meet GMP standards and expectations of our customers.

Liquid Non-Betalaktam production facilities (syrups and suspensions). Non-Betalaktam solid (tablets, caplets, and capsules) and Betalaktam (caplet, capsule and dry syrup) which has been certified GMP is our main asset in meeting the increasing demand.

As one of the main components in the drug manufacturing process, water treatment systems get our special attention. Processed using high-tech tools and through the 5 stages of the process which is controlled strictly to produce pure water that meets quality standards of purified water.

The air in our production facilities is managed by the HVAC system who have qualified and equipped with HEPA filter to ensure the air quality remains at a predetermined limit.

All of our equipment has a design and construction meet GMP requirements. To maintain high quality products, our production process is supported by rigorous oversight, operational personel who are qualified and engine maintenance done routinely. Good quality products only can be generated through the management and control of quality consistent and integrated at every stage of the process.

Research and application pharmaceutical technology oriented, our department of Research & Development are spearheading the creation of new products and the development of variants product. Supported by competent personnel, proven research methods and tools adequate, quality products so as to meet customer expectations and adding value to products that produced. PT Errita Pharma products spread in various regions in Indonesia, its distribution covers the following areas: Sumatera, Java and Bali, Kalimantan and Sulawesi.

Ferron is a fast growing pharmaceutical company. Started operation in 2001, it took us only five years to become one of the 20 largest pharmaceutical operations in Indonesia (Combined IHPA+IPA 2005, IMS Audit). This has been achieved through our persistent efforts to innovate, our passion for quality and the care we have for our customers and people.

As a member of Dexa Medica Group, not only do we share the same work ethics and core values, but we also enjoy the strong support from the Group's Business Development and R&D. This enables us to rapidly build our innovative and quality product range, develop the required competencies in our people and continuously improve our business processes.

Our portfolio includes more than 100 products, a workforce of more than 800 and state-of-the-art manufacturing facility. Our marketing teams promote our own products as well as those of our partners and alliances. Our production facilities manufacture products in different dosage forms, to be sold not only under our own brands but also under the brands of our partners and other companies.

PT. Futamed Pharmaceuticals was established in 2007 to take part in providing the society in Indonesia with medicines that can improve people's lives; maintaining health and curing sickness, allowing them to live their lives to the fullest. We, at Futamed, are dedicated to produce medicines that will help doctors and healthcare practitioners improve people's lives.

We have a mission to provide the communities in Indonesia with the tools and means to be healthy. With over 230 million people, Indonesia is the fourth largest population in the world. Consumption potential is huge, but in many parts of the country, access to adequate and affordable healthcare is limited. Due to this issue, thousands of people are dying each day in Indonesia of common treatable disease. By producing affordable, high quality medicines, and ensuring widespread distribution, Futamed is helping the people of Indonesia to treat these diseases and live a healthy life.

After two decades climbed the world's pharmaceutical Indonesia, PT. Galenium Pharmasia Laboratories have succeeded in building trust and cooperation with many parties, such as distributors, doctors, pharmacies, hospitals, institutions, consumers, drug stores and supermarkets throughout Indonesia. In that time, PT. Galenium Pharmasia Laboratories also has managed to gain recognition as a priority to the quality of the drug industry, and is the first Indonesian pharmaceutical company received three certificates for quality, recognized nationally and internationally.

All of these can be accomplished since our corporate vision emphasizes on the vigorous effort to accomplish anything desired in the future and the attitude to open ourselves to various aspiration with the reliable working counterparts. The working counterparts are they who get involved in the external and internal process to realize our dreams. The dream, however never comes true if there is no one able to visualize a vision in a strategy implementation. Today, PT. Galenium Pharmasia Laboratories employs approximately 500 employees, which work in various division as can be seen in organization structure of the company.

Immortal Pharmaceuticals Laboratories is a newly emerge pharmaceutical company that has a strong commitment to produce a high quality drugs and comply with cGMP as well as the integrative management system of ISO certification from the very beginning.

Immortal Pharmaceuticals Laboratories Co, Ltd was founded on 4 May 2004 in Jakarta, Indonesia. At the beginning the company founded as an answer for the needed of high quality drugs therapy for dermatological problems. Actually, a drug main therapy for dermatologic disease sometimes needed adjuvant therapy such as moisturizer or others. The last had been supplied by Immortal Cosmedika Indonesia that was founded in 1999. Later, with the establishment of Immortal Cosmedika Indonesia, the need for various kind of drugs emerging not only for dermatologic disease, but also other kind of diseases in internal medicine, the ENT, etc. So, starting within the mid of 2008 the premises was build and completely finished around 20 months later. It took more than a year for the completion of industrial permit including the cGMP certification.

Now registration of many products is ongoing process and waiting for the granted permission to marketed our products in the market by the food and drugs regulatory agency. Also we have a commitment to produce a high quality drugs with known safety profile through a well manage system. We are creating an integrative management system under the ISO requirement. It is a new start for a new pharmaceutical company to hold the ISO certification for quality, environment, safety as well as the pharma GMP at once from the very early of its operational system. For this reason, we are now on ongoing process registration of various kinds of products and asking for the ISO provider to start with the inspection on our premises, system and instrument.

PT Kalbe Farma ("Kalbe") was established on September 1966 in Tanjung Priok, North Jakarta. The sharp vision, high sense of entrepreneurship and spirit of hard work displayed by the founders and all the employees have enabled Kalbe to continue to grow. By April 1972, Kalbe moved to a larger area in Pulomas, East Jakarta. Living by its philosophy, Kalbe always moves on and continues to grow. In July 1997, Kalbe moved to its current premises in Delta Silicon Industrial Park, Lippo Cikarang, Bekasi ("Cikarang Site").

Kalbe's main areas of business activities are the production, distribution, marketing and packaging of pharmaceuticals, health foods and other consumer products. In order to facilitate these activities, it currently operates several main divisions : Pharmaceuticals, Consumer health, Nutritionals, Distribution & Logistic, Medical Device, Biopharma, Eye Care and Health Service.

In order to assist Indonesians to achieve a higher quality of life by providing them with products that improve their health and well-being, Kalbe places a strong degree of emphasis on strict adherence to internationally established standards, both in terms of production quality and management practices. Kalbe has achieved ISO 9001, ISO 14001 and OHSAS 18001 certification. Kalbe has also consistently maintained high rankings for its implementation of the principles of Good Corporate Governance.

Kinocare Era Kosmetindo is a manufacturer of a wide range of personal care products (since 1999), beverages (2003), traditional medicines (2011), and pharmaceutical. Kino's product quality has met international standard qualification, proved by the increasing demands from the markets all over the world. However, Kino fully realizes that it can not be complacent. Today's success should boost its motivation for even greater accomplishments in the future. "The Innovator" means keep on being creative and innovative in order to become the leader of the consumer goods industry. Then, with a spirit "Transform To Win" (2013), Kino would like to be a manufacturer on Pharmaceutical Industry.

PT Konimex was founded on June 8, 1967 in Surakarta, Central Java. In 1979, we moved our pharmaceuticals factory to a new manufacturing complex in Sanggrahan, located some five kilometres northwest of Surakarta. While it has its roots in the manufacture of over-the-counter (OTC) medicines, Konimex has now expanded into producing ethical medication and non-curative products such as vitamins and also into herbal medicines.

Aside from tablets, we have syrups, ointments, cream, hard capsules, soft capsules, eye drops and effervescent tablets. All facilities comply to cGMP.

### Products Owned by Pharmacotherapy Classes

- Analgesics, antipyretics, non-steroidal anti-inflammatory medicine, medicine used to treat gout
- Antiallergics and medicines used in anaphylaxis
- Anti-infective anthelmintics
- Anti-bacterials
- Antifungal medicine
- Antiprotozoal medicine (antiamoebic, antimalarial)
- Antiviral medicine (antiherpes, antiretrovirals)
- Antimigraine medicine
- Medicines affecting in blood (antianemia, medicine affecting coagulation)
- Antiseptics and disinfectants
- Ophthalmological preparation
- Gastrointestinal medicines (antiemetic, antihemorrhoid, antispasmodic, antidiarrhea)
- Medicine acting on respiratory track (asthmatic, antitussive, expectorant)
- Vitamins and minerals

PT Medifarma Laboratories was established since 1969. It was before a trading company that imported products directly from Manila, Philippines.

The factory is located in Cimanggis, Bogor, and its management office is in Pulo Gadung Industrial Park, East Jakarta, Indonesia. For more than thirty years, its products has been widely accepted by Indonesian community.

Supported by its parent company, Unilab Manila, a big pharmaceutical company in Manila, Philippines, PT Medifarma Laboratories continuously provides Indonesian people and community the best health care and medication products.

Long time before the legal entity was formed, the products like Decolgen, Decolsin, etc. was already familiar to Indonesian consumer.

In 2003, Medifarma Laboratories forged synergies with Darya-Varia Laboratoria for the marketing of prescription and OTC products, business development and optimization of services and facilities.

Medifarma Laboratories exports its products to the countries of Cambodia, Hong Kong, Malaysia, Myanmar, Philippines and Singapore.

### About Merck Sharp and Dohme

Today's MSD is a global healthcare leader working to help the world be well. MSD is known as Merck in the United States and Canada. Through its prescription medicines, vaccines, biologic therapies, and consumer care and animal health products, MSD works with customers and operates in more than 140 countries to deliver innovative health solutions. MSD also demonstrates its commitment to increasing access to healthcare through far-reaching policies, programs and partnerships.

### About Merck Sharp Dohme Indonesia

In Indonesia MSD operates two legal entities PT MSD Indonesia and PT MSD Pharma Tbk. PT MSD Pharma Tbk was known as PT Schering Plough Tbk, and has been established in Indonesia for 38 years. Currently MSD has more than 550 employees all over Indonesia. Its manufacturing facility is located in Pandaan, East Java, whose 90 percent of its products are exported to 14 countries in Asia Pacific, including Korea, Japan and Australia. In Indonesia, MSD is well known for its innovative products and research in Non-Communicable Diseases such as Cardiovascular, Metabolic, Pain, Cancer; Communicable diseases such as HIV, HPV; and also Women's health including reproduction health and contraception. MSD commitment is to improve Indonesians' quality of life through better access to quality healthcare. As part of that commitment, we also commit to increase access to healthcare through far-reaching policies, programs and partnerships.

PT Mersifarma TM, named "Mersi" in short, was established in 1997. The founders of Mersi came from different fields of expertise: health, pharmacy, business, and socio-economics; with their pioneering vision and professional expertise. The foundation of Mersi constituted from a strong desire to endeavour in the manufacturing of medicines needed for large segments of the population.

Mersi initially focused on manufacturing of medicines to combat Neuro-Psychiatric, Psychosomatic and Mental Health Diseases, but the need for a much large extension and augmentation became apparent. Today other important areas of healthcare are also catered for at Mersi and they include - Internal Medicine, Pulmonary Diseases, Obstetrics-Gynaecology, Neuro-surgery, Ear-Nose and Throat Diseases, Dentistry, and the urgently needed advanced antibiotic therapeutic agents. Dedicated to the highest level of scientific excellence, Mersi has maintained stringent product quality checks and we are committed to the highest standard of ethics and integrity. Mersi is also an accredited holder of Good Manufacturing Practice (GMP) Certificate and is permitted to produce 13 product items.

In 2013, Mersi produces 120 pharmaceutical products and the company is projected to expand and grow productions to keep in line with the aim of the Indonesian National Social Security System. As a young dynamic pharmaceutical company, Mersi enjoys a sound global reputation as our quality products are distributed in countries like Cambodia, Timor Leste, and The Philippines.

Through strategic business development, global expansion will continue to thrive in the coming years with exports made accessible to more countries worldwide. In the coming year, Mersi keeps improving its level to product development by acquiring the latest manufacturing machinery as well as increase its market presence through active participation in medical and pharmaceutical events both domestically and abroad.

PT Nicholas Laboratories Indonesia its pharmaceutical industry beginning in 1948. In 1951, Nicholas Pty Ltd began manufacturing one of its best known products "ASPRO" at its new factory in Jakarta.

Between 1963 and 1968, the company engaged in contract manufacturing for Pfizer of the United State. In 1971, the company entered into a production and marketing agreement with Parke Davis & Co of the United States. The arrangement continued until 1975, at which time the Indonesian company – now renamed PT Nicholas Laboratories Indonesia formed by a joint venture with an Indonesian partner.

In 1989, all of the shares of Nicholas Pty Ltd of Australia were sold to PT Kebayoran Pharma, an Indonesian company. Thus, PT Nicholas Laboratories Indonesia achieved domestic investment status and became part of the Kebayoran Pharma Group.

In 1991, PT Nicholas Laboratories Indonesia relocated its manufacturing operations to a new factory in Jakarta Industrial Estate Pulogadung. All production now takes place within this complex, which meets strict internationally recognized cGMP standards. Since then, the range of ethical products manufactured and marketed by PT Nicholas Laboratories Indonesia has increased considerably.

Novartis' history in Indonesia began already in 1968 through the incorporation of PT Ciba Indonesia. After undergoing several milestones, following the global merger of Sandoz and Ciba Geigy to create Novartis, PT Ciba Indonesia merged with PT Sandoz Biochemie Pharma to become PT Novartis Biochemie in 1996.

Today, Novartis in Indonesia employs about 615 employees and owns the manufacturing plant in Pasar Rebo, East Jakarta. The company also has a research center in partnership with Hassanuddin University, Novartis Hasanuddin Research Institute (NHCR) in Makassar, Sulawesi which focus in developing drugs for tropical diseases such as Dengue and Tuberculosis.

Novartis' other 2 sister companies, PT Ciba Vision Batam is a global supply chain hub for Ciba Vision contact lenses and contracts 2000 associates at its plant in Batam Island and PT Sandoz Indonesia runs the Generic medicines Division and employs 532 employees and also operates a plant in Pasar Rebo, East Jakarta.

PT. OTTO Pharmaceutical Industries is part of Mensa Group; it is a pharmaceutical manufacturing company producing a variety of quality medicines with the aim to serve the people nationwide.

OTTO was established on the 8th April 1963 in Bandung, West Java. In 1981, the ownership of the company was taken over by Mensa Group, during which time a management re-organization took place including the improvement in the company's accounting system and the addition of production facility within the plant.

In June 2005, the company obtained ISO 9001:2000 certifications from RWTUV GmbH Germany (ISO international).

In the beginning of 2007, started planning on build a new manufacturing plant. There are two separate building comprising of:

- Cephalosporin production facilities for Sterile & Non-Sterile (Capsule & Dry Syrup)
- Non B-Lactam production facilities for Sterile (Liquid (Aseptic & Terminal Sterilization) & Powder) & Non-Sterile (Solid & Liquid)

OTTO appointed NNE Pharmaplan as their consultant for the design concept following the standard of PIC/S, EU and GMP.

Pharos Indonesia, Ltd. was established on September 30th, 1971 in Indonesia. Pharos Indonesia, Ltd. is a national pharmaceutical company with one objective to dedicate and develop pharmaceutical industry for all of its stakeholders. The name "Pharos" is taken from an enormous lighthouse in Alexandria Bay which was regarded as one of 7 wonders of ancient world. The name of Pharos also means healing, independence, determination perpetuity.

Currently, the company's vision is "To become Indonesia's fastest growing pharmaceutical company in Indonesia be the first or second choice partner in providing solution to its customers"

In 1990 the company received Good Manufacturing Practice (GMP) certificates from local authority of Indonesia, National Agency of Drug and Food Control (NADFC) Indonesia. In addition Pharos Ltd. had received awards as the best company in waste water management for several times, and received "Blue Grade" (above average) for the last two years which is presented every year by Ministry of Environment.

PT. Pyridam was founded in 1976 as a veterinary products manufacturing company. Nine years later, in 1985, PT. Pyridam began to diversity its business and started its prescription pharmaceutical production. In 1993, PT. Pyridam Veterinary was established to separate the veterinary business from the pharmaceutical. Since then, PT. Pyridam Veterinary's focus is on veterinary business, whereas PT. Pyridam continues to focus on pharmaceuticals, bio-medicals and lab wares segments.

In 2001, PT. Pyridam moved its production to its new facility located in Pacet, Cianjur, West Java. In the same year PT. Pyridam completed an initial public offering (IPO) of 120,000,000 ordinary shares and subsequently, PT. Pyridam had been registered and listed on the Indonesian Stock Exchange (formerly Jakarta Stock Exchange). At the same time, PT. Pyridam also changed its name to PT. Pyridam Farma Tbk, while PT. Pyridam Veterinary retains its name and remains as a private limited company.

PT. Takeda Indonesia was established on September 28 1971 with the capital Rp.1,467,000,000 and engages in the pharmaceutical business both ethical and over the counter products. The company is a subsidiary of Takeda Pharmaceutical Company Limited, Japan, the worlds' leading pharmaceutical company with research and development based.

Our mission is to contribute for better health of the society through innovative pharmaceutical products. Well trained and high skill employees always dedicate to provide high quality of products and services.

In the principle of providing innovative products, we run business fully comply with laws and business ethic. High standard of compliance program was implemented.

Various products are manufactured at our own factory located in Bekasi, West Java. Recently we obtained a Grade A class of GMP Mapping conducted by BPOM (health authority of Indonesia). We strive to comply and fulfill all GMP standards and requirements. Moreover in certain areas we put higher level than GMP for consumers' benefits. We credit our reputation to the fact that we control all aspects of manufacturing and packaging process. Quality assurance has always been our concern. In addition, for the sake of environmental protection we always manage and control the waste and the quality of waste water to avoid environmental disturbance.

Today, we market a broad range of products such as anti-hypertensive, anti-diabetes mellitus, anti-inflammation, anti-hemorrhoid, antibiotics, endometriosis, prostate cancer, gastric & duodenal ulcer, cataract, insomnia and vitamins. Those are to boost grow of health and improve quality of life of customers.

We know the importance of customer relationship. Therefore, we believe in developing and fostering partnerships that are mutually beneficial. We have always been, and will continue to be, the best partner of medical professionals. Certified sales persons regularly visit to them. We view our success as dependent on our customers and consumers satisfaction, both now and in the future.

PT.Triyasa Nagamas Farma (TNF) is the pharmaceutical industry that committed to provide family health solution. TNF was founded on February 11th, 1988. The construction of the manufacturing plant was begun on October 8th, 1990 and was inaugurated by the minister of Health Republic of Indonesia, dr. adhyatma M.P.H, on July 18 th, 1992. Initially, TNF produced only contraceptive products to support the national family planning program, which has achieved various international recognitions. Up until now, we have expanding our products lines in contraceptive products, as well as OTC products and general health products. TNF was awarded good manufacturing practice certification (GMP) in 1992 for our facilities as well as every product we produce. Furthermore, TNF also was awarded ISO 9002 certification in 1997 and ISO 9001:2000 for the quality management system. TNF was awarded HALAL Products and SNI Drinking Water too. Our laboratories are equipped with modern equipment of international standards, such as LAF, HPLC (High Performance Liquid Chromatographyl), Violet/ Infra Red, spectrophotometers ensuring raw materials, manufacturing process and finished goods meeting pharmacopoeia regulations. Our products are divided into two parts : Contraceptive Hormone (Suspension Injection, Tablet and Implant) and Non hormone (Tablet, Syrup and dinking water). Besides that all TNF has highly skilled workers and highly qualified professionals over 256 employees, including doctors, pharmacists, chemists, biochemists and microbiologists. with our products, we hope to contribute to society by providing better health and well being.

As since its establishment by Mr. and Mrs. Zainal Abidin in 1969, PT. TUNGGAL IDAMAN ABDI has gained a reputation worldwide for continued excellence throughout its manufacturing and export businesses. PT. TUNGGAL IDAMAN ABDI, founded in 1968, is a national pharmaceutical company committed to delivering high quality healthcare products through continuous research and various development initiatives. Our purpose is to help people improve their quality of life through easy and economical access to consistently superior-grade medicines.

Through years of experience and partnerships with internationally-recognised multinational pharmaceutical firms, PT. TUNGGAL IDAMAN ABDI plays an important role in maintaining the national standard in areas such as contraceptive and reproductive health medicine.

One of PT. TUNGGAL IDAMAN ABDI highest achievements is producing FDA-approved contraceptives, namely Depo Provera® for almost 30 years through toll-in manufacturing partnership with a global US pharmaceutical / Fortune 100 company until 2005 when the company ceased its marketing activities in Indonesia. This achievement was followed by the launch of the company's own brand for the domestic market and export market, both produced to the same standard with qualities matching the previous product.

Since 1993, PT. TUNGGAL IDAMAN ABDI has been manufacturing a monthly injectable contraceptive Cycloferm® under the license of Concept Foundation © USA / Health Concepts International which has provided us with technical inputs and clinical / preclinical information. We have since produced 90 million vials and expanded to exporting to various overseas markets.

Today PT. TUNGGAL IDAMAN ABDI continues to experience growth through the extension of its product portfolio in reproductive healthcare and other product categories.

PT. VITABIOTICS HEALTHCARE is a group company of UK- based Vitabiotics Ltd., headquartered in London, England. Vitabiotics operates globally and has created a unique portfolio of products at the forefront of scientific developments in the field of "nutrient medicine" (nutraceutical). The product portfolio represents virtually all areas of human healthcare and current medical interest.

Though Vitabiotics marketing operations in Indonesia date back to 1999, PT Vitabiotics Healthcare was created as a new company in Indonesia in 2008 primarily to focus on manufacturing. Currently, the company is engaged in the production of pharmaceutical formulations for Vitabiotics own needs as well as contract manufacturing. The factory has GMP certificate to manufacture and package non sterile tablet, film coated tablet, hard capsule, liquid and semi-solid dosage form for medicine, food supplement and quasi categories.
